I Fiori Cannonau di Sardegna DOC

- Varieties: 100% Cannonau
- Type: Red
- Region: Sardegna, Italy
- Alcohol Level: 14.0%

Wine Description:

Cannonau has been growing in Sardinia since the Neolithic period and is one of the most widely planted varieties on the island. Recent studies indicate that Cannonau, a variety rich in phenols, is the wine to drink for longevity. This is supported by the fact that Sardinia has one of the world's largest populations of centenarians. Originally called Triente, Pala's Cannonau has been renamed i Fiori (the flowers) in honor of Sardinia's biodiversity. The flower on the label is an endemic plant of the island. After temperature-controlled fermentation, the wine spends 8 months in stainless steel and concrete tanks and then rests for 2-3 months in bottle before release.

Tasting Note:

Intense ruby-red color with subtle spice and mature red fruit aromas. Medium-bodied with good structure and a lingering finish. Serve with both white and red meats, spicy foods and flavorful cheeses.
