*Valle de Uco*

**VILLAGE WINES**

We make mountain wines. The Andes Mountain Range determines the identity of our wines, since it is decisive in the climate, water and soils.

We believe that the Uco Valley is, due to its proximity, the area that best expresses the mountain identity in Mendoza. Since we began to explore its diversity, I was captivated by the austere richness and uniqueness of each of its villages.

Polígonos is the expression of those villages of the Valley. These are wines that make us travel through those places, through their landscapes, climates and soils.

Its grapes come from different places that can be imagined on a map with diverse shapes and edges. A capricious geometry as diverse as the sides of a Polygon. As diverse as the wines of each village.

*Sebastián Zuccardi*

## POLÍGONOS SAN PABLO

### CABERNET FRANC 2022

#### ORIGIN

IG San Pablo, Tunuyán, Valle de Uco, Mendoza.

1400 m | 4593 ft.

#### THE PLACE

Located between 1,200 and 1,700 meters above sea level, and only 600 meters away from the mountain front, San Pablo has a cold and extreme climate, with very low minimum temperatures. Trees and streams abound in its landscape, configuring a true oasis in the foothills. Its alluvial soils originated in the Las Tunas River and present a layer of medium-sized gravel covered with calcareous material at approximately one meter deep.

#### HARVEST

The 2022 vintage was fresh and well balanced. The particular combination of high insolation with low temperatures allowed the vine to ripen steadily and keep its natural acidity intact. These conditions gave rise to elegant, fine and complex wines, with a great balance between juiciness and freshness.

#### VINIFICATION

Fermentation with native yeasts in concrete vessels.

Aging in used, untoasted 500-liter French oak barrels and 2500-liter foudres.

#### COMPOSITION

VARIETY: 100% Cabernet Franc

ALCOHOL: 14% vol.

TOTAL ACIDITY: 5,64 g/l

PH: 3,64
